

OCRYL®

OCULAR CLEANSER*

Physiological cleansing of the eyes, eyelids and periorbital region.

- REMOVE DUST, DISCHARGE, CRUSTS AND SECRETIONS.
- PREPARE THE PERIORBITAL REGION BEFORE APPLYING EYE DROPS OR OINTMENT.
- HELP REDUCE DISCOLOURATION OF THE HAIR AT THE CORNER OF THE EYES.

DISCOLOURATION OF THE HAIR

The discolouration of the hair at the corner of the eyes can be unsightly when noticeable on pale fur and can be secondary to ocular conditions causing excessive tearing* or due to the structure of the face.

- ✓ Consider starting Ocryl® use in puppies and kittens in susceptible breeds or pets with light coloured fur and make it part of your routine hygiene regimen.

.....

Start phase:

Apply once or twice a day using a compress or cotton pad soaked in the solution until the discoloration fades.

.....

Maintenance phase:

Apply 2 to 3 times a week using a compress or cotton pad.

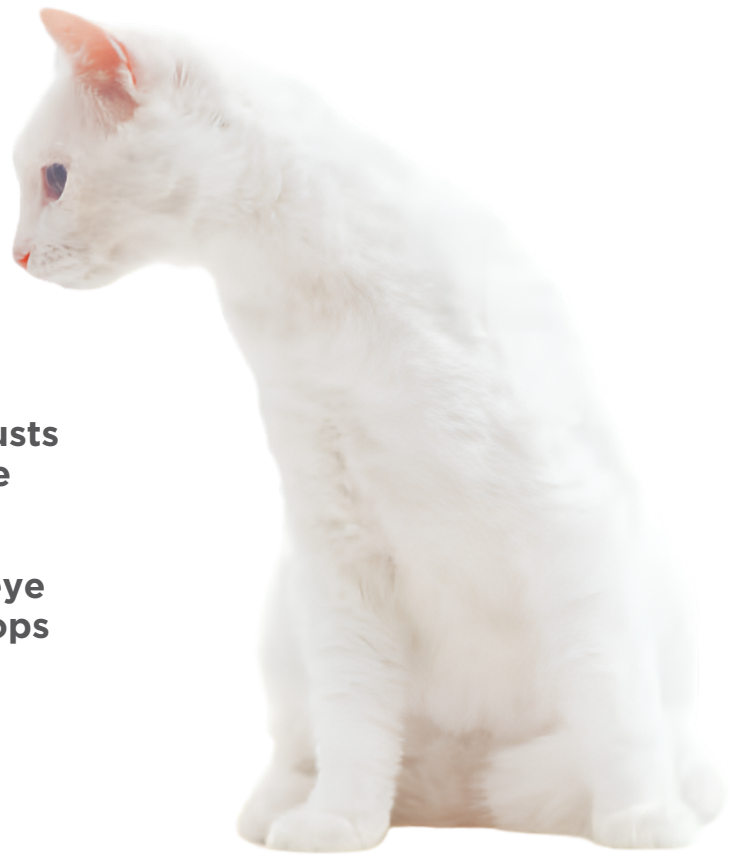

*It is advisable to investigate and treat underlying causes of excessive tearing where possible.

OCRYL®

OCULAR CLEANSER

- ✓ Solution designed to help eliminate dust, discharge, crusts and secretions that can cause irritation.
- ✓ Can be used to prepare the eye for the application of eye drops or ointment.
- ✓ Ocryl® is well tolerated as it's pH is identical to tears.

APPLICATION

Apply directly by dispensing a few drops to the eye or by soaking a cotton pad to clean the eye area.

135 ml bottle

Ocryl® is available in bottles of 135ml. Ocryl® contains benzalkonium chloride, methylene blue, rose essence, and buffered components (including boric acid and sodium borate). For more information: info.canada@domespharma.com
