DÔMES PHARMA

Product guide

Dômes Pharma

Established for 79 years, Dômes Pharma is a French, family-owned and international animal health group, dedicated to companion animals.

+ Our mission

(Re)inventing, with passion and humanity, solutions for the health and well-being of pets, for more complicity and a better life.

+ Our values

Our heritage also includes historical values that give meaning to our actions. These values are the pillars of our corporate culture, the common bond that drives us:

- Think with **BOLDNESS**
- Act with **RESPONSIBILITY**
- Show **KINDNESS**

+ Our strategy

In the vet channel worldwide

At the service of veterinarians and clinic staff, we develop underserved specialized therapeutic areas through a holistic strategy that delivers value and innovation.

OPHTHALMOLOGY RANGE - DAILY CARE

EYE EXPERTS

The background of the entire page is a close-up photograph of a white dog's face. The dog has bright blue eyes and a large, black, textured nose. The text 'EYE EXPERTS' is centered over the dog's face. The word 'EYE' is in a large, bold, blue font, and 'EXPERTS' is in a smaller, bold, blue font below it. There are two small white silhouettes: one of a person examining a dog's eye, positioned above the 'E' in 'EYE', and another of a person sitting, positioned to the left of the 'E' in 'EYE'.

Ocryl®

OCULAR CLEANSER

135 ml bottle

Physiological cleansing of the eyes, eyelids and periorbital region.

- Removes dust, discharge, crusts and secretions that can cause irritation.
- Prepares the area before applying eye drops or ointments.
- Helps reduce hair discolouration at the corner of the eyes.

For dogs, cats, horses and exotic pets.

Apply directly by dispensing a few drops to the eye or by soaking a cotton pad or compress with the solution to clean the eye area.

For discolouration of the hair in the corner of the eyes:

- Start phase: Apply Ocryl® using a compress or cotton pad soaked in the solution once or twice a day until the discoloration fades.
- Maintenance phase: Apply Ocryl® using a compress or cotton pad soaked in the solution 2 to 3 times a week.

- **Key components:** Benzalkonium chloride, methylene blue, rose essence, and buffered components (including boric acid and sodium borate)

The Ocryl® formulation has been specially designed so that its pH, identical to that of tears, ensures excellent tolerance.

Ocry-gel™

OCULAR PROTECTOR

10 g tube

Ocular protector to provide physiological maintenance and lubrication of the eye during situations of corneal exposure.

- Ocry-gel™ presents exactly the same pH and osmolality as the tear film.
- Its bioadhesive power (remanence) paired with its pseudoplasticity (as a lubricant), it produces a highly effective eye support gel.

For dogs, cats, horses and exotic pets.

- 0.5-1 cm spread over the eye surface on average twice a day or as necessary.

- **Key components:** Carbopol 980 NF (0.2%), cetrimide

Carbopol 980 NF is a hydrodispersible polymer able to hold more than 500 times its weight in water.

REMEND™ 0.4

OCULAR PROTECTOR

10 ml bottle

Ocular protector for prolonged hydration and lubrication in case of dry or irritated eyes.

- Ocular protector based on cross-linked hyaluronic acid BioHance™ (0.4%).
- Provides advanced lubrication and hydration for dry or irritated eyes.
- Improves ocular comfort for the animal.

- For dogs, cats, horses and exotic pets.
- Apply 1 to 2 drops directly onto the eyes 2 times a day or more when eye lubrication is needed.

- **Key components:**
- BioHance™ cross-linked Hyaluronic Acid: 0.4%
- Preservative-free

Our BioHance™ patented technology enables to chemically modify HA to obtain a cross-linked HA which is more resistant to natural degradation, while providing an ideal environment to enhance hydration and lubrication for dry or irritated eyes.

REMEND™ 0.75

CORNEAL SUPPORT

3 ml bottle

Intense lubrication for corneal support.

- Corneal support based on cross-linked hyaluronic acid BioHance™ (0.75%).
- Provides intense lubrication to support the cornea.
- Improves ocular comfort for the animal.

- For dogs, cats, horses and exotic pets.
- Apply 1 to 2 drops directly onto the eyes 2 times a day.

- **Key components:**
- BioHance™ cross-linked Hyaluronic Acid: 0.75%
- Preservative-free

Our BioHance™ patented technology enables to chemically modify HA to obtain a cross-linked HA which is more resistant to natural degradation, while providing an ideal environment to enhance hydration and lubrication for dry or irritated eyes.

CARBO RANGE

ACTIVATED CHARCOAL SYRINGES

AVAILABLE TO
VETERINARY PRACTICES

THE
CARBO
RANGE

CARBOPRIME™

VETERINARY HEALTH PRODUCT (VHP)¹

ACTIVATED CHARCOAL GEL

1 syringe (78g)

For the maintenance of intestinal health and support of digestion by helping to neutralize combinations of gas-producing foods. Promotes normal stool quality and intestinal health.

- Combination of activated charcoal and sodium sulfate.
- Carboprime should be used **first** and administered **only once**.

- For dogs and cats only.
- One dot (•) on the syringe corresponds to 7.8 g of product.
- 10 dots (•) correspond to one syringe.
- A syringe for 20 kg.
- An appropriate combination of syringes is required for animals weighing between 20.1 and 80 kg.

- **Key ingredients:**
Activated charcoal (30%), glycerin, sodium sulfate (6.25%)

CARBOGEL™

VETERINARY HEALTH PRODUCT (VHP)²

ACTIVATED CHARCOAL GEL

1 syringe (72g)

For the maintenance of intestinal health and support of digestion by helping to neutralize combinations of gas-producing foods. Promotes normal stool quality and intestinal health.

- For oral and **repeated** use.
- The administration can be repeated every 4 to 6h (for 1 day) or according to your veterinarian's recommendations.

- For dogs and cats only.
- One dot (•) on the syringe corresponds to 7.2 g of product.
- 10 dots (•) correspond to one syringe.
- A syringe for 20 kg.
- An appropriate combination of syringes is required for animals weighing between 20.1 and 80 kg.

- **Key ingredients:**
Activated charcoal (30%), glycerin

LIFE SAVERS

PrHemophyt®VETERINARY DRUG³

PHYTOMENADIONE 50 MG TABLETS

⋮ 12 x 7 tablets

Film-coated tablet containing phytomenadione (Ph. Eur.), a vitamin K1 used as an antidote following the ingestion of vitamin K antagonist anticoagulants in dogs.

- For the maintenance treatment of anticoagulant poisoning in dogs following emergency vitamin K1 parenteral treatment in the presence of clinical coagulopathy⁴;
- Or, as a sole agent for the treatment of subclinical coagulopathy⁵ caused by anticoagulant poisoning.

- For dogs only.
- 50mg of phytomenadione (vitamin K1) per tablet.
- For oral use at 5 mg/kg once daily for a minimum of 21 days (1 tablet per 10 kg per day).
- Administer the tablets 30 to 60 minutes after a meal.
- Tablets that can be broken into halves and quarters.

- **Active ingredient:**
Phytomenadione
(Vitamin K1)

Phytomenadione is the active substance in Hemophyt, essential for the synthesis of vitamin K-dependent coagulation factors and the maintenance of the vitamin K1 cycle.

³PrHemophyt®: For veterinary use only. To be used only by or on the order of a licensed veterinarian. Please refer to the product label for complete product information. Veterinary Drug DIN 02539314.

⁴Clinical coagulopathy is defined as the presence of haemorrhage that may occur on a single or on multiple locations, combined with a prolonged one-stage Prothrombin Time (PT) value.

⁵Subclinical coagulopathy is defined as a mild coagulopathy ($\geq 20\%$ increase from the upper end of normal Prothrombin Time reference range) occurring in the early phase of anticoagulant poisoning, when dogs do not show any clinical signs.

MATERIAL INTENDED EXCLUSIVELY FOR VETERINARIANS.
